SWIFT SAFARI!

ALL ABOUT SWIFTS!

Meet Selwyn the Swift! He wants to tell you all about the swifts that breed in Neath Port Talbot each summer!

Where do they live?

Swifts love warm places. In the summer they fly to towns across Europe to nest. But when the summer is over, they fly all the way to Africa = that's 6,000 miles! They do this long journey every year!

Sky Superheroes!

Once they leave the nest, they may fly for years before landing. They eat, sleep and even wash while flying! They are also speedy and can fly as fast as 69mph!

What's for dinner?

Swifts zoom through the sky with their mouths wide open to catch tiny insects like flies and mosquitoes. They are clever too, because they know to avoid stinging bugs like wasps and bees!

Where do they raise their chicks?

Swifts don't nest in trees like lots of other birds. They like little holes in buildings, so they love towns and villages! Because they need our help to find a home, we should keep nest holes open or put up special nest boxes just for them!

Swifts love to shout!

When they fly together swifts make a loud, high-pitched "screee!" sound. It's like they're yelling "wheeee!" while zooming around. That's why a group of swifts is called a screaming party!

QUIZ TIME!

Where do swifts fly from each Summer to get to Wales?

a) Australia

b) South America

c) Africa

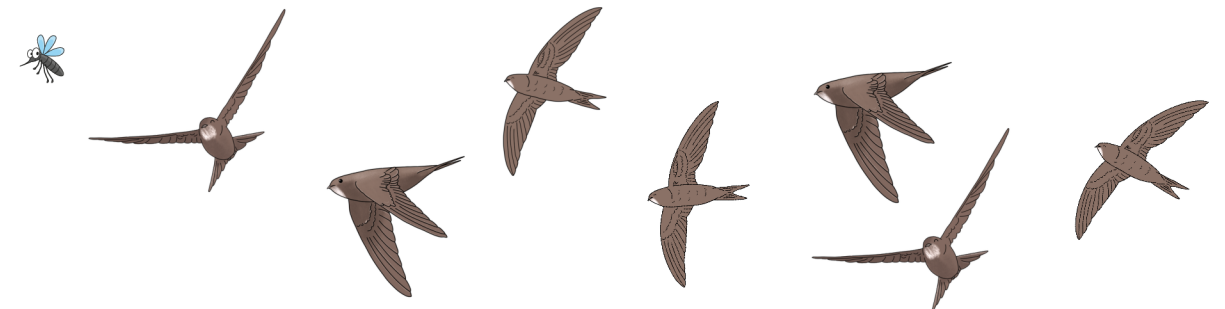

How fast can swifts fly?

a) 20 miles per hour

b) 100 miles per hour

c) 69 miles per hour

What is a group of swifts called?

a) Screaming party

b) A shout

c) Swooping party

MOSQUITO MUNCHING

Help Selwyn find his chick their dinner by circling all the mosquitoes you can spot in this booklet!

How many did you find? _____
